## Made for Your Life

Design your home the way you want. In your style. LEBO doors fulfil your dream home. Versatile, stylish and individual. Just for your life. The full-glass doors from LEBO allow light to flow through your rooms. In both plain and refined glass, they epitomise a modern, straightforward living style like no other product. The light makes your rooms pleasant and friendly. It makes small living areas appear larger. Large rooms are shown to their best advantage. All glass doors are also available as double-leaf or sliding doors.

WE ARE LEBO

# Sustainable & Healthy

Like no other building material, wood provides the direct feel of nature! This is probably why we love to live surrounded by wood. Measures adopted to protect and maintain the unique resource of our woodlands are therefore becoming increasingly important. Because we take this responsibility very seriously, a gentle and sustainable way of dealing with wood and wooden materials is firmly built into our principles for working. Beside to the variety of our range, LEBO attaches special importance to the use of environmentally friendly materials.

**SUSTAINABLE**

### **Screen Print**

A ceramic colour with a satinato look is burnt in the glass. This results in an extremely scratch-resistant surface. In addition to an appealing look and feel, screen printing is characterised by its ease of maintenance. A surface sealed by the stoving process is particularly resistant to heavy use and soiling.

### **Sandblasting**

Sandblasting creates a subtle matt surface finish. The sandblasted surfaces in the motif create a special lighting effect in the room. Due to the technical realisation, completely individual motifs can also be applied to the glass according to customer requirements. The high-quality CleanEasy-Nano coating (CE-N) seals the surface, making the glass door easy to clean.

### **Laser Technology**

A tiny part of the glass is melted using a laser, leaving behind small dots that appear white due to the refraction of light. This creates the finest details and shading on the glass. By this melting a closed surface is created which is characterised not only by a particularly shimmering light effect but also by great durability.

# GLASS PROCESSING

## **Fluted Bevel**

Groove cuts are applied to the glass door in a fine V-joint. Depending on the desired opacity, clear or satinised glass is used as the basis. In addition to the tactile feel of the groove cut, the prism effect creates a very special play of light.

## **Textured Lacquer**

Coating with special glass lacquers gives glass surfaces an opaque, elegant appearance with high brilliance and luminosity. Applied as a motif or as a glazing bar division, the lacquer technique offers a wide range of possible applications.

# Perfect for Quick Building Projects

Clients in a hurry benefit from fast, reliable deliveries with our extensive stock programme.

## Mix & Match

Clean lines create a tidy look. Harmoniously matching furniture, carefully selected accessories – you don't need much more to create a beautiful room. Full-glass doors from the GrooveGlass range combine the modern elegance of lines with stylish clear or matted glass. The perfect ingredients for a cosily furnished room.

## Focusing on the Essentials

With Aalto we follow the design trend towards new simplicity – focusing on the essential and functional, without losing the sense of aesthetics.

There are absolutely no drill holes. The magnetic closure and an adhesive handle do not require any extra machining, as a result, the opening direction and hinge side remain flexible.

### **The Advantages of the Series Aalto:**

- As the door leaf, frame and hinges lie in one plane, the Aalto series forms a perfect partner for our other flush door sets
- The closing magnet and magnet plate on the door allow a contact- and noiseless closing

## Airy Loft Character

High-quality textured lacquer applications in deep black set these special accents on these glass doors. Optionally on clear, matt or grey tinted glass. Clear glass ensures an open and modern living room design with a clear view. The frosted matt glazing provides more privacy through reduced transparency and the grey tinted glass surface creates a particularly elegant look.

## Modern Look in a Trendy Industrial Style

Tasteful accents can be ideally realised with Steel Loft doors. The combination of steel and glass is delicate and minimalist, yet absolutely modern and expressive.

Our Steel Loft doors can be fully customised and adapted to your personal wishes. Whether full-surface glass with a steel frame or in combination with a steel trellis frame. As a classic swing door or as a space-saving sliding door, loft doors are a real eye-catcher and create a special sense of space with their minimalist elegance.

Which fitting fits you?

The Purista sets are slightly more generous fittings (lock case 165x66x21mm)

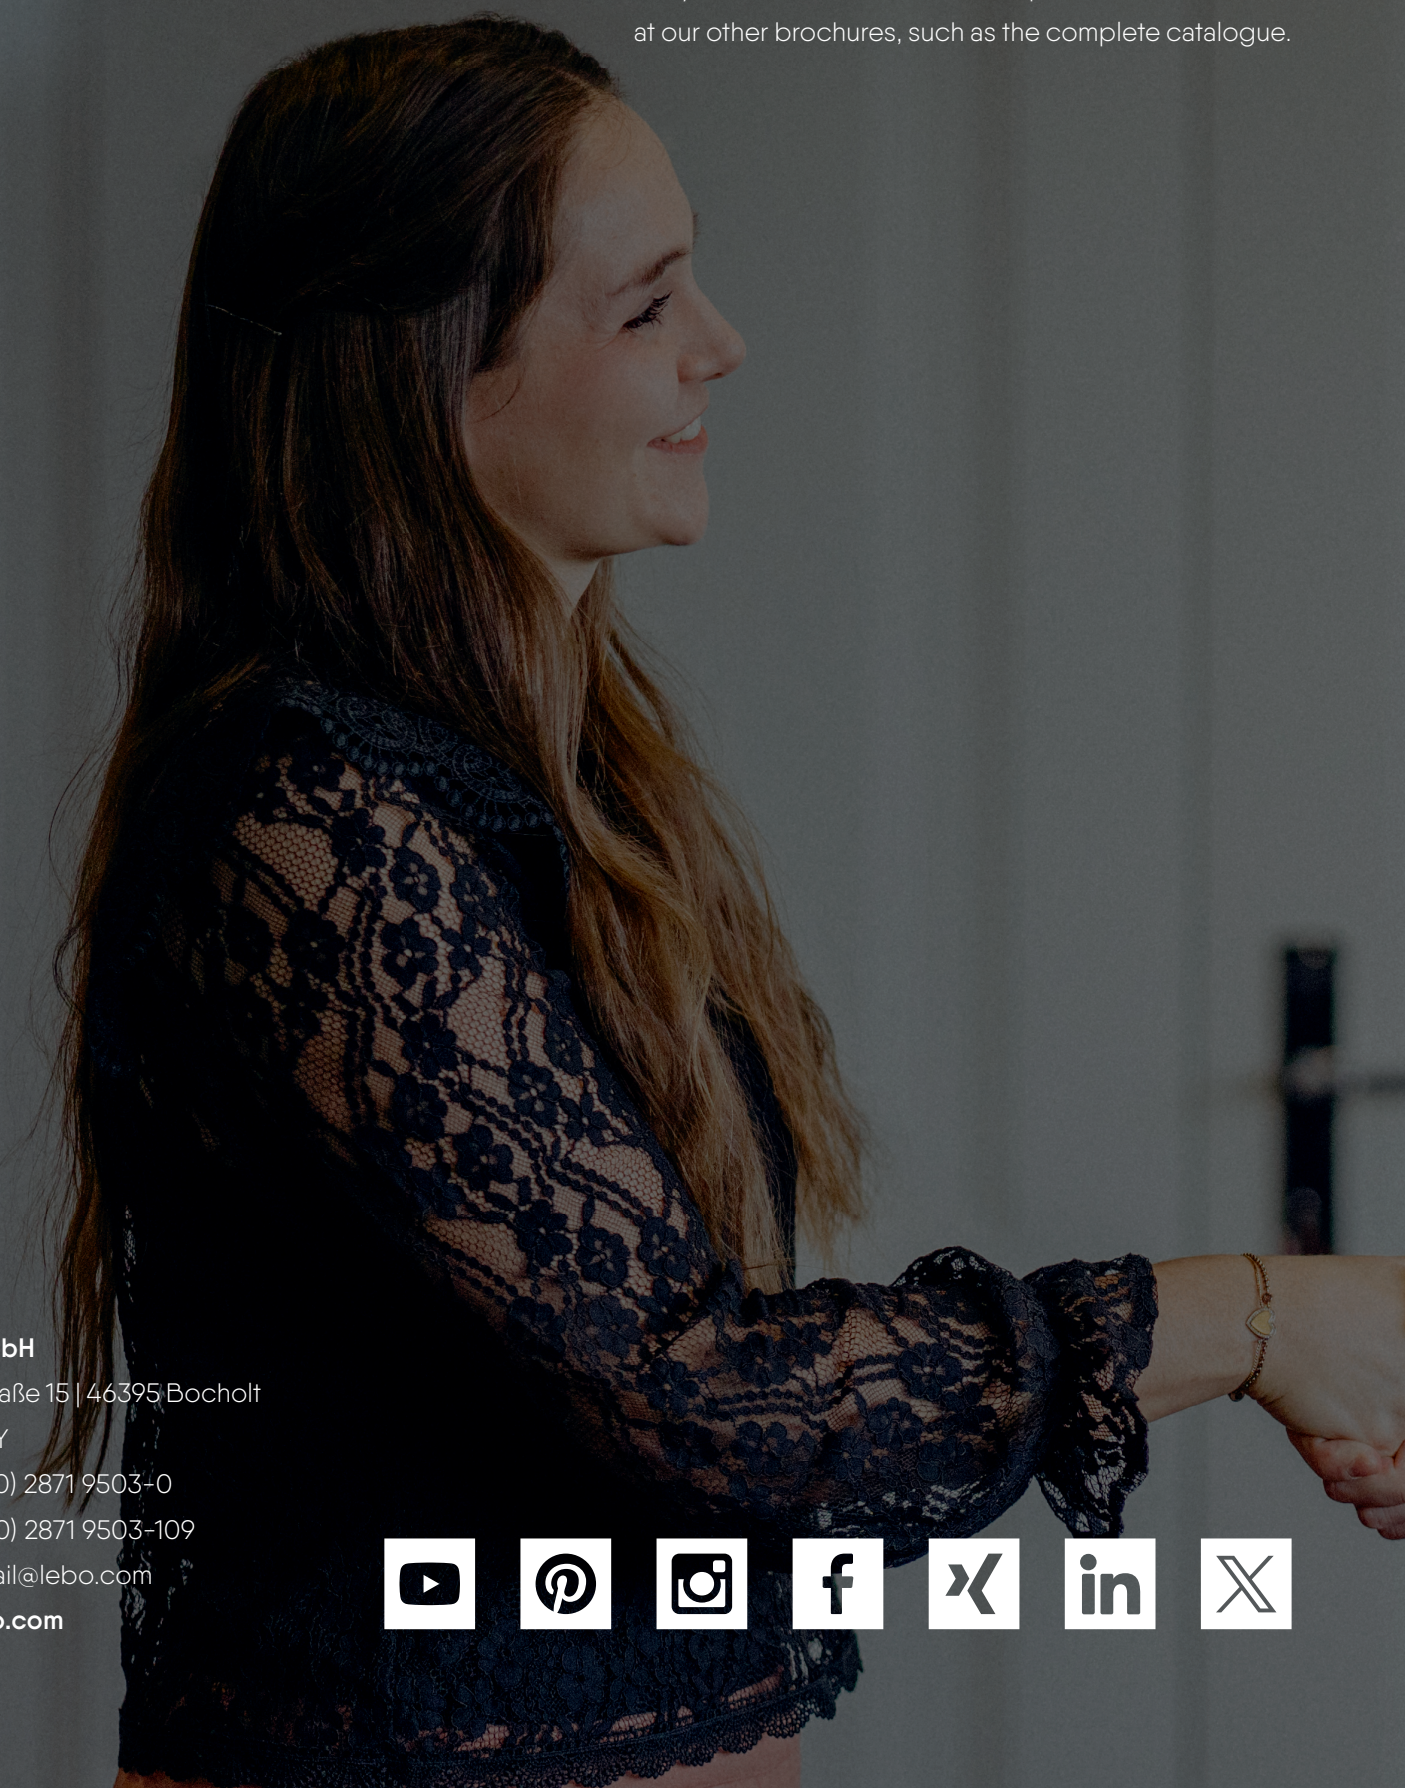

The Teramo sets, on the other hand, are a more delicate fitting variant (lock case 155x60x18.5mm)

Looking for more inspiration?

Glass doors are not the only way to create great accents  
in your home.

For your individual needs and requirements, take a look  
at our other brochures, such as the complete catalogue.
